Limousin, Lim-Flex & Angus Sale

Morris

Dear Limousin Friends and Enthusiasts,

We welcome you to our 5th annual Limousin Bull and Female Sale. P Bar S Limousin Ranch was created to be a seed stock supplier for only the best Limousin and Lim-Flex cattle that we could produce and of course backed with the finest customer support that we can offer. We are in hopes that as you view the following pages of this sale catalog that you will recognize the strength in cow families and the predictable genetics that we have put together for your appraisal. The P Bar S team headed up by general manager Bob Getz along with Elgin Elmore have done a tremendous job over the years in creating some of the very best genetics that they could imagine. We love this breed of cattle and are so proud to be involved in all levels of the business. From the most elite Purebred and Lim-Flex to being a supplier of powerful beef bulls for purebred and commercial cattleman alike.

If we can be of any assistance to you prior to or during the sale then please don't hesitate to call anyone of us ... it is our business to work with our clients in making sure they invest in the best cattle that fit their individual programs.

Sincerely,

Paul Sisemore

P Bar S Ranch

- Homozygous black and double polled is what this future breed highlight will be
- Sired by the leading son of Deuce from MAGS Strawberry that topped a once Magness sale and is now the leading sire for Enright Farms in Canada
- From one of the breed's most recognized donors and a past national champion, Carrousel's Pina Colada
- This mating is going to result into something extremely special and will be a high-light for whomever has the last bid

- Selling half interest and no possession
- We are very certain that this female could be one of the best to ever carry the PBRS prefix
- Sired by the leading Angus sire SAV Bismarck and from the leading P Bar S donor, MAGS New Games 169N, a daughter of MAGS Little Brother from the once National Junior Heifer Show champion, MAGS Games We Play
- 0111X is made nearly perfect and has the design, profile and unique look needed to be a big time donor
- P Bar S is going to break their golden rule and keep half interest in this female, which shows you how much they truly believe in her
- She posts a -1.5 for BW, 27 for milk and has a .16 for marbling
- The buyer will get half interest and no possession in both the cow and the young CALO Brickyard calf at her side.
- **LOT 2A - PBRS 284Z** - 9.01.12, 50% Lim-Flex, double polled, double black heifer sired by CALO Brickyard 902W, BW: 61 lbs.

- Bred 7.12.12 to PBRs 024X; P.E. 5.18.12 to 7.31.12 to PBRs 024X
- This flushmate to 178Y reinforces the predictability found in these proven genetics.
- 176Y, like her sisters combines all of those economically important traits such as calving ease, growth, milk and carcass quality.
- Homozygous black and homozygous polled.
- Her dam PBRs Sandy is consistent in her production and has made a great donor cow.

- Bred 6.13.12 to PBRs 024X; P.E. 5.18.12 to 7.31.12 to PBRs 024X
- Red and double polled.
- This 75% Lim-Flex is a flush mate to the two previous lots and equally as valuable.
- Proven genetics, superb EPD's and a beautiful look is what 177Y has to offer.
- She is deep flanked, soggy middled and stands on a tremendous foot.

- 751Y is a homozygous polled and double black 50% Lim-Flex sired by JCL Lodestar 27L and out of a S A V Net Worth dam.
- He has a -0.9 birth EPD, 61 weaning and 116 yearling EPD respectively, 31 for milk and a .11 marbling EPD.
- Those numbers combined with a weaning weight of 812 lbs make 751Y one of the more predictable bulls in the offering.
- If you talk about phenotype you notice his length of body, depth of fore and rear rib, smoothness of shoulder and muscle that he possesses.

- Double black and double polled.
- This is a 50% Lim-Flex out of a herd sire sired by DHVO Deuce 132R and a really good Angus cow.
- He has a -.4 birth weight EPD, 84 yearling EPD and a 25 for milk.
- If you are in the need for a replacement bull then 801Y is a good one to look at. His pedigree and numbers target all aspects of the beef industry and he will not let his new owners down.

Crossbreeding, the only FREE Lunch in the Cattle Business

The Benefits of Hybrid Vigor without the Hassle:

Crossbreeding made easy with Lim-Flex

Crossbreeding for the right blend of muscle, maternal ability, and profit just got easier. Introducing registered Lim-Flex seedstock, the pedigreed blend of 25-75% Limousin with Angus (black or red). The muscle and cutability of Limousin with marbling and fleshing ability of Angus, creates a product that translates into profit from the pasture to the rail.

Lim-Flex takes the hassle out of crossbreeding. Lim-Flex provides just the right shot of Limousin and Angus to excel in any market, without the extra management of rotational crossbreeding. Whether you're breeding calves to sell through Strauss Brands, CAB, or the local livestock market, Lim-Flex not only fit but can top the market, and NALF is here to help. Contact NALF's Commercial Marketing Department for more information on its marketing programs.

"Not only do Lim-Flex females offer unprecedented longevity, but they are extremely fertile and maternally inclined."

~ Andy Bailey,
Star Valley Ranch, Hiko, NV

Progressive producers recognize the advantages of hybrid vigor

- 20% more pounds of calf per cow exposed (due to hybrid advantages in age at puberty, conception rate, survival to weaning, milk production, and weaning weight)
- 1.3 years of additional cow longevity
- 30% greater lifetime production
- Increased fertility and decreased gestation length with hybrid bulls

Lim-Flex Advantages

- Flexible seedstock for simple, easily managed crossbreeding
- Flexible marketing options to maximize profit
- Flexible market progeny that consistently hit dressing percent, along with yield and quality grade targets for mainstream markets
- Flexible females adapted for efficiency across a wide range of environments

"Our cattle have to be stout, easy fleshing, maternal, and able to fend for themselves. Lim-Flex do this better than any other type of cattle we've ran."

~ Casey Deuter, Deuter Ranches, Ree Heights, SD

NORTH AMERICAN LIMOUSIN FOUNDATION

EPD and Performance Information

The EPD's in this catalog reflect the new base used to calculate EPD's for Limousin cattle. They now have the same look as Angus EPD's. For commercial producers this rescaling helps simplify the use of Limousin EPD's by managing the set of ranking benchmarks similar of both breeds. While EPD's of the two breeds cannot be directly compared, if you know the benchmark within the Angus genet- ic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Twice a year EPD's are recalculated to include any new data that has been sub- mitted to NALF. This is done to keep them up to date and improve accuracies. With this in mind, expect EDP's to change on the animals you purchase. The EPDs for the LimFlex calves reflect the combined EPD's of the Angus Assoc. and the cur- rent information in the Limousin EPD bank from the sires and dams of that breed. As this is a fairly new development, the accuracies will be low.

PERFORMANCE EPD' s ...

- CE: Stands for calving ease direct and is important when choosing sires to produce calves born easily. The higher the number, the better.
- BW EPDs: Express the difference in birth weight on the progeny of the bulls being compared.
- WW EPDs: Express the difference in pounds at 205 days on the progeny of the bull being compared.
- YW EPDs: Do the same as WW except it is the weight at 365 days.
- MA EPDs: Predict differences in weaning weights from daughter's calves due to genes inherited for milk.
- CETM EPDs: Stand for Calving Ease Total Maternal and are important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPDs: Are expressed in centimeters of scrotal circumference, and compare the difference expected in sons of the animal. Scrotal EPDs are a good indicator of age of puberty of both the sons and daughters of the animal.

CARCASS EPD' s ...

- CW EPDs: Express the difference in pounds of carcass weight.
- REA EPDs: Express the difference in square inches of rib eye area.
- YG EPDs: Due to the limited range and usefulness of Limousin in fat thickness EPDs, they have been replaced with the more informative EPDs for yield grade I. YG EPDs are favoried and indicate genetic differences for yield grade and cutability of offspring.
- FAT EPDs: Express the difference in the inches of back fat.
- MS EPDs: Express the difference in the amount of marbling or flecks of fat in the rib eye.
- \$\$ VALUE
- INDEXES: Used to rank animals according to net genetic merit for profit from genetics for post-weaning growth and carcass performance.
