"The little Ranch with BIG Genetics."

Dear Limousin Friends and Enthusiasts,

This year marks our 6th Annual Limousin and Lim-Flex sale and we have never been more excited about our product than we are right now. We have always referred to our place as "The little Ranch with BIG genetics." All of us here at P Bar S Ranch absolutely love the Limousin breed and the people that are involved in it. We set out year's ago to develop and propagate as good of genetics that we could and wanted to be a reputable source for the buying public. Through the help of our very able general Ranch manager Bob Getz along with our assistant manager Elgin Elmore we have been able to accomplish so much in this breed over the years. The biggest accomplishment that we have ever achieved is the acceptance of our PBRS product. We are so proud that the genetics have worked well for our customers and we continue to see success with their past purchases and then their progeny. As you view this sale catalog and study the genetics if you have any questions we ask that you please take time to give us a call, we love to talk cattle and would love to hear from you.

It is our business to work with our clients in making sure they invest in the best cattle that fit their individual programs.

Taylor & Tenley Elmore

Sincerely yours,
Paul Sisemore

A highlight of the sale are these two matings of Connealy Consensus. They are sired by the leading Angus sire and proven sire of top Lim-Flex calves in our breed. His genetics mated to Limousin seems to work very well and these two calves are a prime example of that statement. The history of how well progeny have done from Carrousels Pina Colada is a major accomplishment in any program. Some of the best matings to Pina have been from Angus sires. We are confident that these calves will for sure make a positive influence in our breed and with the program that make the investment.

These two lots represent the very best of the best in our breed. The bull and the heifer will be sired by the 2013 National Champion Lim-Flex bull MAGS Y So Tangled. He is a homozygous polled, homozygous black 62.5% Lim-Flex son of MAGS Winston from MAGS Untangled. He was also the grand champion bull at the 2012 NAILE show as well. He is owned by Magness, Logan Hills, Edwards Limousin and Tubmill Creek. A person can only imagine how great these future calves are going to look when they hit the ground. The mating of these two nationals together we feel will result in some of the best progeny to date from the breed matriarch "Pina".

A.I. 12.06.12 to SL Grand Slam; P.E. 12.31.12 to 1.31.13 to PBRs 020X
Here is a homozygous black female that has been a top producer at P Bar S Ranch. She is a top producer because that is exactly what she is designed to be. She represents a proven and prominent pedigree that has as much promotion that you would ever want in one animal. She is a daughter of the once national champion bull DHVO Deuce and from the once national champion Carrouels Pina Colada. This female is in the prime years of her production and no matter the program that gets the winning bid on her will not have to worry about people not recognizing who she is.

A.I. 5.18.13 to EF Xcessive Force 105X; P.E. 6.28.13 to 7.29.13 to PBRs 024X
PBRs Zebeca 248Z is a daughter of Carrouels Pina Colada and from MAGS Winston. MAGS Winston is now deceased but is the son of BT Crossover 758N from the elite donor MAGS Strawberry. His calves have been in the marketplace for the last couple of years and have been very well accepted. This mating of two of these breed greats has created a very well made and nice structured brood cow. She posts a -1.3 for birth, 27 for milk and .26 for marbling. She sells carrying the service to either EF Xcessive Force or the double homozygous son of Deuce, PBRs 024X.

Selling a guarantee of 6 embryos sired by the bull of the buyer's choice.

FLLR Tiger Lily is a 25% Lim-Flex donor that has taken over the lead as one of the favorites at P Bar S Ranch. That statement alone says a lot! She is a daughter of MYTTY In Focus back to a daughter of TNUH Blue Print 245H. She is as deep bodied and powerful as you could ever imagine. She is massive in her rib shape and depth of body. She is huge in her foot size and extremely sound in her structure. This broody female and now big-league donor has surpassed all expectations at P Bar S Ranch. Just take a look at her progeny and you will realize like we have about how great of a producer she is. P Bar S Ranch will offer 6 embryos sired by the bull of the buyer's choice.

This could be one of the finest ever created by the P Bar S team. She is a top show heifer prospect that we all feel will have a very bright future in the show ring. She is flawless in her design and very complete in her profile. Her sire is EF Xcessive Force, the bull created by Etherton Farms and was led to be the national champion Lim-Flex bull and then later sold to Thomas & Son Farms in Maryland. He is now a leading service sire in the Linhart Limousin herd in Iowa. His calves are taking the breed to a new level and we are certain you will like this heifer as much as we do. Her dam is the leading P Bar S donor, FLLR Tiger Lily 051T. We can only hope that PBRs 320A can grow up and do as well as her mother.

The little Ranch with BIG genetics.

Here is the natural calf from FLLR Tiger Lily 051T. She is sired the P Bar S herd sire PBRs Ur The Bomb 8155U, a son of SAV Net Worth from WLR Rendezvous 050R. This young heifer represents the best of the best and that is the reason why she is so good. She is very moderate in her frame score and extremely well balanced. We appreciate her flawless design and unique profile. She is double polled, homozygous black and one terrific female.

PBRs 369A is a very appealing show heifer prospect that we are certain will impress you when you see her in person. She is sired by MAGS Y-Axis, the leading 50% Lim-Flex sire that has impressed many that have seen him and for the owners Englewood Farm. He is a huge numbered, well-made and once top selling bull in our breed and was bred in the Magness program. This young heifer comes from one of the top donors at P Bar S, FLLR Tiger Lily 051T. PBRs 369A is very sound in her structure, soft made and has a very appealing and prominent look to her.

Without a doubt this could be one of the very best females to sell this year. She is a daughter of MAGS Twain, the leading sire for Hayhook Limousin and O'Neal Limousin in Arkansas. He is a son of AUTO Dollar General 122R and is from a daughter of GAR Precision 1680. She is from the leading P Bar S Ranch donor FLLR Tiger Lily 051T, the amazing daughter of MYTTY In Focus. She was purchased as the top lot in the '11 Jepson Limousin sale where she had this young JEPS 103Y at her side. JEPS Tiger Lily 103Y is huge footed, very soft in her pasterns, very angular up through her front end, massive in her rib shape and so complete in her profile. This is one female that will make you stop and take a drink of water because your blood pressure will be up once you take a look at her.

- Selling half interest and half possession
- Homozygous polled and homozygous black
- Here is one of the leading herd sires ever created and to carry the PBRs prefix
- He is a 50% Lim-Flex son of MAGS Landmark, the service sire at P Bar S sired by Wulf's Titus and from a daughter of MAGS Shari
- This young bull is from a grand daughter of Bon View New Design 878
- He is huge footed, super soft in his pasterns and very fluid in his movement
- What is great about this bull is that he is extremely deep bodied but at the same time extremely heavy muscled
- He offers a low birth of 80 pound, weaning weight of 811 pounds and yearling weight of 1,264 pounds.
- He scanned a 14.29 for REA and 3.58 for IMF

The little Ranch with BIG genetics.

303-220-1693

Crossbreeding, the only FREE Lunch in the Cattle Business

The Benefits of Hybrid Vigor without the Hassle:

Crossbreeding made easy with Lim-Flex

Crossbreeding for the right blend of muscle, maternal ability, and profit just got easier. Introducing registered Lim-Flex seedstock, the pedigreed blend of 25-75% Limousin with Angus (black or red). The muscle and cutability of Limousin with marbling and fleshing ability of Angus, creates a product that translates into profit from the pasture to the rail.

Lim-Flex takes the hassle out of crossbreeding. Lim-Flex provides just the right shot of Limousin and Angus to excel in any market, without the extra management of rotational crossbreeding. Whether you're breeding calves to sell through Strauss Brands, CAB, or the local livestock market, Lim-Flex not only fit but can top the market, and NALF is here to help. Contact NALF's Commercial Marketing Department for more information on its marketing programs.

"Not only do Lim-Flex females offer unprecedented longevity, but they are extremely fertile and maternally inclined."

~ Andy Bailey,
Star Valley Ranch, Hiko, NV

Progressive producers recognize the advantages of hybrid vigor

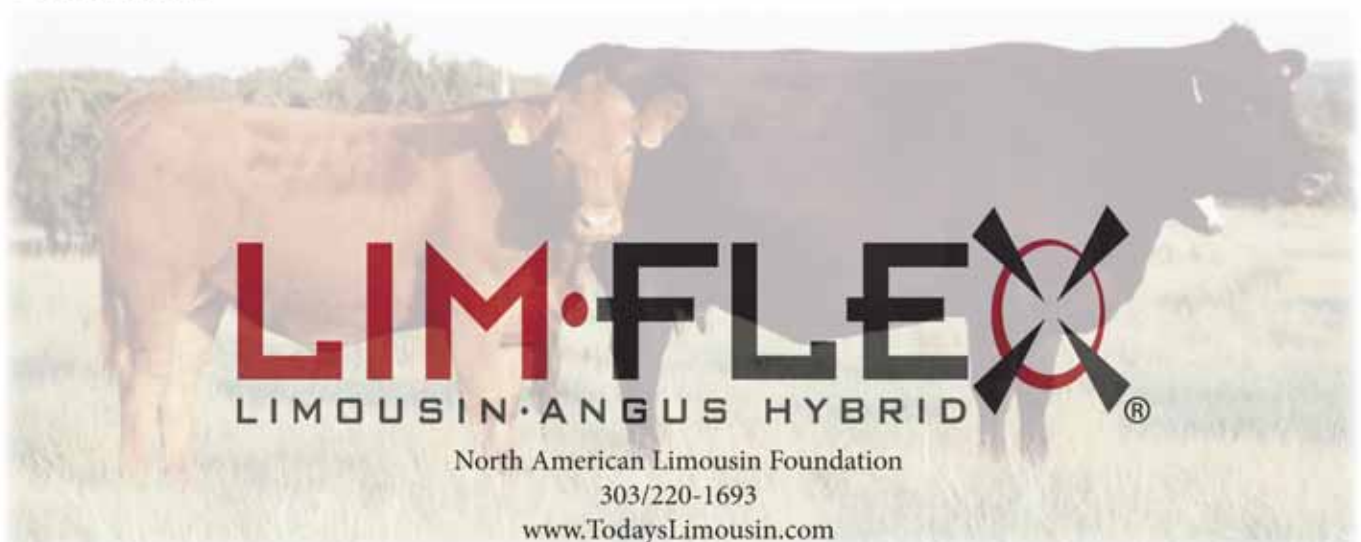

- 20% more pounds of calf per cow exposed (due to hybrid advantages in age at puberty, conception rate, survival to weaning, milk production, and weaning weight)
- 1.3 years of additional cow longevity
- 30% greater lifetime production
- Increased fertility and decreased gestation length with hybrid bulls

Lim-Flex Advantages

- Flexible seedstock for simple, easily managed crossbreeding
- Flexible marketing options to maximize profit
- Flexible market progeny that consistently hit dressing percent, along with yield and quality grade targets for mainstream markets
- Flexible females adapted for efficiency across a wide range of environments

"Our cattle have to be stout, easy fleshing, maternal, and able to fend for themselves. Lim-Flex do this better than any other type of cattle we've ran."

~ Casey Deuter, Deuter Ranches, Ree Heights, SD

NORTH AMERICAN LIMOUSIN FOUNDATION

EPD and Performance Information

The EPD's in this catalog reflect the new base used to calculate EPD's for Limousin cattle. They now have the same look as Angus EPD's. For commercial producers this rescaling helps simplify the use of Limousin EPD's by managing the set of ranking benchmarks similar of both breeds. While EPD's of the two breeds cannot be directly compared, if you know the benchmark within the Angus genetic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Twice a year EPD's are recalculated to include any new data that has been submitted to NALF. This is done to keep them up to date and improve accuracies. With this in mind, expect EPD's to change on the animals you purchase. The EPD's for the LimFlex calves reflect the combined EPD's of the Angus Assoc. and the current information in the Limousin EPD bank from the sires and dams of that breed. As this is a fairly new development, the accuracies will be low.

PERFORMANCE EPD' s ...

- CE: Stands for calving ease direct and is important when choosing sires to produce calves born easily. The higher the number, the better.
- BW EPDs: Express the difference in birth weight on the progeny of the bulls being compared.
- WW EPDs: Express the difference in pounds at 205 days on the progeny of the bull being compared.
- YW EPDs: Do the same as WW except it is the weight at 365 days.
- MA EPDs: Predict differences in weaning weights from daughter's calves due to genes inherited for milk.
- CETM EPDs: Stand for Calving Ease Total Maternal and are important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPDs: Are expressed in centimeters of scrotal circumference, and compare the difference expected in sons of the animal. Scrotal EPDs are a good indicator of age of puberty of both the sons and daughters of the animal.

CARCASS EPD' s ...

- CW EPDs: Express the difference in pounds of carcass weight.
- REA EPDs: Express the difference in square inches of rib eye area.
- YG EPDs: Due to the limited range and usefulness of Limousin in fat thickness EPDs, they have been replaced with the more informative EPDs for yield grade I. YG EPDs are favored and indicate genetic differences for yield grade and cutability of offspring.
- FAT EPDs: Express the difference in the inches of back fat.
- MS EPDs: Express the difference in the amount of marbling or flecks of fat in the rib eye.
- \$\$ VALUE
- INDEXES: Used to rank animals according to net genetic merit for profit from genetics for post-weaning growth and carcass performance.
